

### HAZARD IDENTIFICATION AND ANALYSIS

Name of School: Deerhurst	Date of Assessment: 30/6/11
---------------------------	-----------------------------

MAIN HAZARDS	WHO MAY BE HARMED?
Possible road traffic accident	Pupils, Instructors, Members of the public
Impact with something solid	Pupils, Instructors
Slips, trips and falls	Pupils, Instructors
Abduction	Pupils
Getting lost	Pupils, Instructors
Injury from bike itself	Pupils, Instructors, Members of the public

HAZARD	RISK RATING Without controls	CONTROL MEASURES	RISK RATING With controls
Inexperienced pupils, maybe with low confidence and on road for the first time	Medium	<ul style="list-style-type: none"> <li>➤ Supervision by competent, trained and qualified instructors at ratio of 1:6 for Level 1, 1:3 for L2.</li> <li>➤ High visibility clothing worn by all pupils and Instructors.</li> <li>➤ Instructors briefed on pupils' medical and special needs.</li> <li>➤ Route to be used to be approved by Road Safety Unit, Police and School.</li> <li>➤ Pupils aware of strict guidelines for behaviour and briefed to stop safely on the left should anything unexpected happen or they are unsure what they should do.</li> </ul>	Low
Road traffic accident	Medium	<ul style="list-style-type: none"> <li>➤ Accident and emergency procedures known to Instructors.</li> <li>➤ Instructor to assess pupils' basic cycle control before going out on to the highway.</li> <li>➤ Instructors follow guidelines in Instructors' manual relating to the manoeuvres to be practised.</li> </ul>	Low
Impact with something solid	Low	<ul style="list-style-type: none"> <li>➤ Instructor to inform pupils about any potential hazards (e.g. hazards on the pavement, skips in the road).</li> </ul>	Low
Slips, trips and falls	Medium	<ul style="list-style-type: none"> <li>➤ Instructor to inform pupils about any potential hazards.</li> <li>➤ Instructors aware of the possible effect of different weather conditions.</li> <li>➤ Instructor to identify any change in surface or route prior to taking children out. (see ANY OTHER SPECIFIC HAZARD)</li> </ul>	Low
Injury from bike itself	Medium	<ul style="list-style-type: none"> <li>➤ Guidelines for behaviour when with the bike standing / walking / pushing.</li> <li>➤ No cycling allowed, unless instructed by Instructor.</li> <li>➤ All bike checks observed by Instructors.</li> <li>➤ All pupils when with their bikes are escorted by Instructors</li> </ul>	Low

Abduction	Low	➤ Pupils to be in view of an Instructor at all times.	Low
Getting Lost	Low	➤ Instructors briefed on routes. ➤ Pupils to be in view of an Instructor at all times.	Low

### GENERAL ROAD HAZARDS WITHIN THE SPECIFIED AREA

Difficult/unusual/confusing junctions	Instructors must familiarise themselves with the area to be used before training begins. Identify any parts that are too challenging and avoid them. For other difficult sections ensure only pupils with adequate skills and confidence ride them and that they are briefed on the best approach.
Busy/fast roads	Ensure pupils are briefed before riding on these and understand how they affect decision making and manoeuvring.
Steep gradients	Make sure pupils are warned in advance and select appropriate gears and/or control their speed.
Kerbs/Bollards/Barriers	Brief pupils to adopt suitable road position that minimises risk of collision.
Rough/poor surfaces/traffic calming	Ensure pupils are warned in advance to reduce the risk of sudden braking or steering
Parked vehicles	Instructors to teach and the pupils to practice safe overtaking on a quiet section of road before they attempt junctions or more challenging sections.
Very wide or narrow junctions/carriageways	Instructors should emphasise the importance of good road position, ensure pupils understand priorities and use their own riding position to provide maximum protection where required.
Restricted views	Instructors to warn pupils to take extra care with observations and to take positions that maximise the available views.
Pedestrians	Instructors to warn pupils to take extra care where there are large numbers or they may be distracted.

### GENERAL NOTES

Plenty of well marked junctions in the village but most have a challenging feature. The area includes some hills and the B4213 is a significant step up in traffic speed and volumes so instructors will need a good overview of the area and the groups abilities when planning routes.

ANY OTHER SPECIFIC HAZARD (see map)	ACTION TO BE TAKEN
1. The junctions of Chester Way and Westview both have block paving or cobbles that may be slippery when wet.	Instructors to assess conditions on the day, use alternative junctions if necessary and discuss with pupils the likely effects on braking and steering and how to minimise them.
2. View to the right from Ringers Rd. is restricted by bend.	Instructors to discuss with pupils the extra care needed with observations before all turns but particularly rights here.
3. Complex junction layouts with islands at both and also a staggered crossroads at Gabb Lane/Sawpit Lane.	Instructors to discuss with pupils the priorities and the best route options for particular manoeuvres. Ensure pupils are clear about the effects on possible traffic movements and the extra care required with observations and decisions here.
4. Another island type junction onto a busier road with a one way for major to minor lefts.	As for 3 above plus only to be ridden by pupils who have previously shown good understanding and awareness on less challenging roads.
5. School Rd. has a significant slope down out of the village and becomes narrower.	Instructors to assess pupils control up and down less challenging gradients before riding here. Discuss with them the importance of controlling speed and direction and the effect signalling may have.
6. Another island junction with the B4213	As for 4 above
7. Another steeper slope down the B4213 and a cattle grid close to the junction on Wainlode Lane that may be slippery when wet.	As for 1 and 5 above

**Suggested Routes/Junctions for initial on road training (see map ).** Instructors should train here until pupils have demonstrated sufficient skills and awareness to move on to more challenging roads and junctions within the specified area.

**More Challenging Routes/Junctions for able pupils (see map ).** Instructors to avoid or walk these sections with less able/inexperienced pupils and use them for left turns and other simple manoeuvres with the rest. Pupils who have demonstrated a sufficiently high level of ability may ride more demanding manoeuvres here as an extension activity during later sessions.

INSTRUCTORS NOTES	
Any changes or additional hazards	Control measures and further actions

WHEN SHOULD THERE BE A REVIEW?
➤ Significant change to the environment      ➤ Following an accident      ➤ After a reasonable amount of time
