

## RISK ASSESSMENT FOR BIKEABILITY TRAINING SCHEME - ON ROAD

### GENERAL HAZARD IDENTIFICATION AND ANALYSIS

MAIN HAZARDS	WHO MAY BE HARMED?
Possible road traffic accident	Pupils, Instructors, Members of the public
Impact with something solid	Pupils, Instructors
Slips, trips and falls	Pupils, Instructors
Abduction	Pupils
Getting lost	Pupils, Instructors
Injury from bike itself	Pupils, Instructors, Members of the public

### GENERAL HAZARDS

HAZARD	RISK RATING Without controls	CONTROL MEASURES	RISK RATING With controls
Inexperienced pupils, maybe with low confidence and on road for the first time	Medium	Supervision by competent qualified instructors. Ratio up to 1:12 for Level 1, 1:3 for L2. High visibility clothing worn on road by all pupils and Instructors. Instructors briefed on pupils' medical and special needs. Training only takes place only in the risk assessed area. Pupils given clear guidelines for behaviour and briefed to stop safely on the left should anything unexpected happen or they are unsure what to do.	Low
Road traffic accident	Medium	Accident and emergency procedures known to Instructors. Only pupils who demonstrate adequate Level 1 control allowed to ride on road. Instructors follow guidelines in Instructors' manual for delivery of National Standards outcomes	Low
Slips, trips and falls	Medium	Instructor to inform pupils about any potential hazards. Instructors aware of the possible effect of different weather conditions. Instructor to identify any new specific hazards prior to pupils riding (see ANY OTHER SPECIFIC HAZARD)	Low
Injury from bike itself	Medium	Pupils to be supervised by instructors throughout sessions and only get on or cycle with permission. Clear guidelines given for behaviour when with the bike standing / walking / pushing. All bikes initially checked by Instructors with subsequent pupil's checks observed.	Low
Abduction	Low	Pupils to be in view of an Instructor at all times.	Low
Getting Lost	Low	Instructors briefed on routes and to be in view of an Instructor at all times.	Low

### ROAD & TRAFFIC HAZARDS

HAZARD	RISK RATING Without controls	CONTROL MEASURES	RISK RATING With controls
Difficult/ unusual/ confusing junctions	Medium	Instructors to familiarise themselves with the area to be used before training begins. Identify any parts that are challenging, assess the abilities of pupils and select training site appropriate. For other difficult sections ensure only pupils with adequate skills and confidence ride them and that they are briefed on the best approach.	Low
Busy/fast roads	Medium	Ensure pupils are briefed before riding on these and understand how they affect decision making and manoeuvring.	Low
Steep gradients	Medium	Only to be ridden by pupils who have demonstrated sufficient braking and steering control. Instructors to warn pupils in advance, ensure they select appropriate gears and/or control speed.	Low
Kerbs/Bollards barriers etc	Low	Instructor to inform pupils about any potential hazards and brief them to adopt suitable road position that minimises risk of collision.	Low
Rough/uneven surfaces	Low	Ensure pupils are warned in advance to reduce the risk of sudden braking or steering	Low
Parked vehicles	Medium	Instructors to teach and the pupils to practice safe overtaking on a quiet section of road before they attempt junctions or more challenging sections.	Low
Very wide or narrow junctions/ carriageways	Medium	Instructors should emphasise the importance of good road position, ensure pupils understand priorities and use their own riding position to provide maximum protection where required.	Low
Restricted views	Medium	Instructors to warn pupils to take extra care with observations and to take positions that maximise the available views.	Low
Pedestrians	Low	Instructors to warn pupils to take extra care where there are large numbers or they may be distracted.	Low

### GENERAL NOTES ABOUT THIS SITE

Only a few junctions to choose from. The A38 is not excluded from this assessment but instructors will need to assess all pupils thoroughly before deciding if they are ready to do any riding here. Others may benefit from spending a little time observing traffic speeds and movements.

ANY OTHER SPECIFIC HAZARD in the risk assessed area  (see map)	ACTION TO BE TAKEN
<p>1. Elmside is an unmarked junction with bus stops close by on either side</p>	<p>Pupils will need an understanding of road position and priorities before riding here. Instructors to discuss with pupils the issues of riding close to large vehicles</p>
<p>2. Mandalay Drive is very near to Wainlode Lane</p>	<p>Instructors to discuss with pupils the effect on potential traffic movements and the extra care required with observation and decision-making</p>
<p>3. A38 can be much busier with more large vehicles. It also has faster traffic (50 mph limit) and a significant gradient up to the Kings Head from the north east</p>	<p>Only to be ridden by pupils who have consistently demonstrated all L2 outcomes on less challenging roads and then not to be used for ridden major to minor right turns. Clockwise circuit going up the hill will be too challenging for L2</p>
<p>4. Acute angled junction with Y type layout</p>	<p>As for 2 above plus instructors to discuss with pupils the most appropriate route choice for particular manoeuvres</p>
<p>5. Sharp bend on a narrow part of Wainlode Lane</p>	<p>Instructors to discuss with pupils the extra care required with observation and decision-making and avoid stopping or turning near the bend</p>

Cycle paths (see map ).

**Suggested Routes/Junctions for initial on road training** (see map ). Instructors should train here until pupils have demonstrated sufficient skills and awareness to move on to more challenging roads and junctions within the specified area.

**More Challenging Routes/Junctions for able pupils** (see map ). Instructors to avoid or walk these sections with less able/inexperienced pupils and use them for left turns and other simple manoeuvres with the rest. Pupils who have demonstrated a sufficiently high level of ability may ride more demanding manoeuvres here as an extension activity during later sessions.

### INSTRUCTORS NOTES

**Any changes or additional hazards**

**Control measures and further actions**

### WHEN SHOULD THERE BE A REVIEW?

- Significant change to the environment
- Following an incident
- After a reasonable amount of time
